EXPERIENCE

Freelancer

Remote

Full Stack developer

2024-Present

- Built and delivered full-stack web applications for clients with focus on performance and usability
- Demonstrated strong problem-solving, communication, and planning skills across multiple projects

Glow Tech

Remote

Full Stack developer

2024-2025

- Worked on client-based web development projects as part of a small freelance agency team
- Collaborated with a small team to manage tasks, plan features, and deliver projects efficiently
- Focused on clean architecture, scalability, and real-world problem solving

PROJECTS

Manage My Tabs (Browser Extension)

- Developed a productivity extension to save and restore browser tab sessions, solving real-world workflow disruption issues
- Allows users to save, restore, and organize browser tabs for better workflow and focus
- Designed to reduce browser clutter and improve session management for developers and general users
- Implemented core Chrome extension APIs for tab management and local storage

LMS Website (MERN Stack)

- Built a full-stack LMS platform enabling clients to sell and manage online courses with a modern UI and seamless user experience
- Implemented core backend features including authentication, role-based access control, course enrollment, payment tracking, and email notifications

- Integrated secure media access for videos, documents, and meeting links with production-ready deployment on cPanel

Client Websites (WordPress & SEO)

- Delivered responsive WordPress websites for small businesses focused on branding, visibility, and conversions
- Optimized website structure and basic SEO to improve search engine presence and user engagement

ACHIEVEMENTS

- 1st Runner-up at Cyber Utsav Hackathon , recognized for problem-solving and rapid development skills
- Participated in 100x Hackathon, building real-world solutions under time constraints in a collaborative environment
- Contributed as a tutor and content creator at CodeGhar YouTube Channel, teaching programming fundamentals
