- | | | | | |
|--------------|------------|----------------|--------------|------------------------|
| • Node JS | • Mongo Db | • Tailwind Css | • JWT & RBAC | • Docker & Giit Github |
| • Express JS | • Prisma | • Wordpress | • REST API | • Redux |
| • React JS | • Fastify | • TypeScript | • Socket.io | • React Native (Expo) |

PROJECTS

LMS Website For Client (MERN Stack)

- Built a Learning Management System enabling clients to sell courses online with a modern landing page and seamless course purchase flow.
- Implemented backend-heavy features including user management, course enrollment, payment tracking, email notifications, and access control for videos, documents, and meeting links.
- Deployed the application on cPanel, handling production configuration, database setup, and live environment stability.

AI Website Builder Web Application (MERN Stack)

- Developed an AI-powered web application that generates complete websites based on user input, reducing manual development time.
- Designed backend systems for AI integration, token-based usage limits, authentication, and project management APIs using Node.js and MongoDB.
- Built with a production-ready architecture, modular backend services, and scalable design (deployment-ready).

Freelance Client Projects (WordPress & SEO)

- Delivered client websites using WordPress, focused on business growth, online presence, and conversion optimization.
